Digipoort & Standard Business Reporting – Reporting standardization in The Netherlands

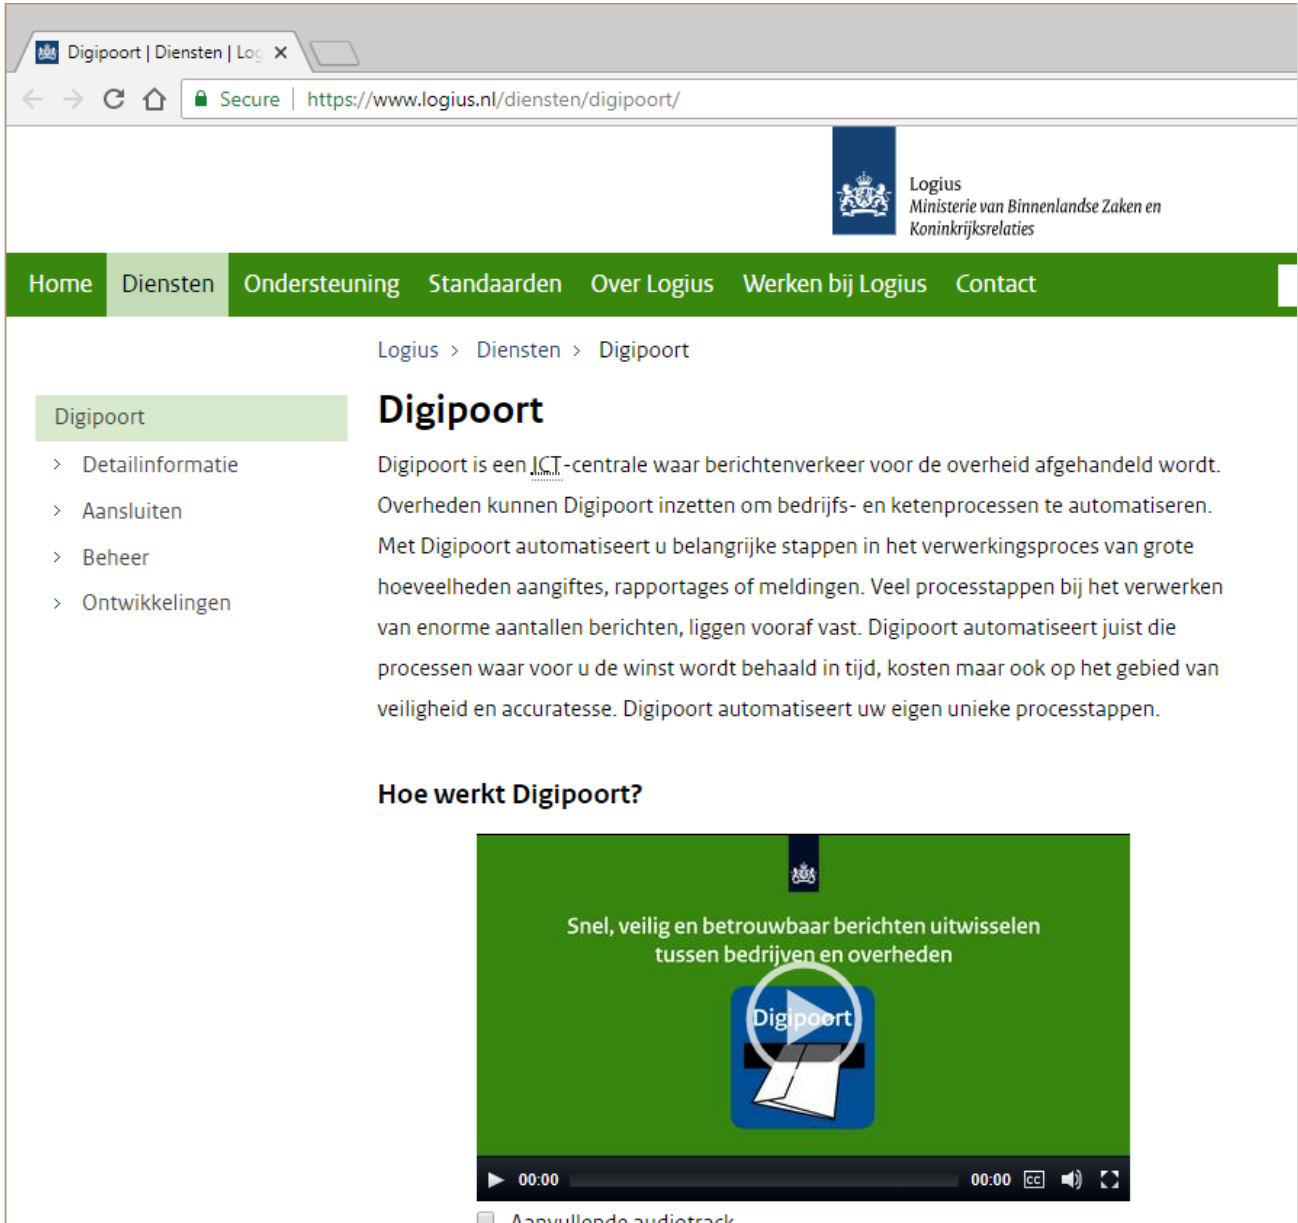
Logius

Ministry of the Interior and Kingdom Relations

Bas Groenveld, Adviser International Affairs

Agenda

- Introduction
- What is Digipoort
- Why Digipoort & SBR
- How does it work
- Results & lessons learnt



Introduction

BAYERN

- 70,550 km²
- Pop. 12,930,751
- GRP: € 594 bn

NETHERLANDS

- 41,543 km²
- Pop. 17,200,671
- GDP: € 703 bn

Introduction

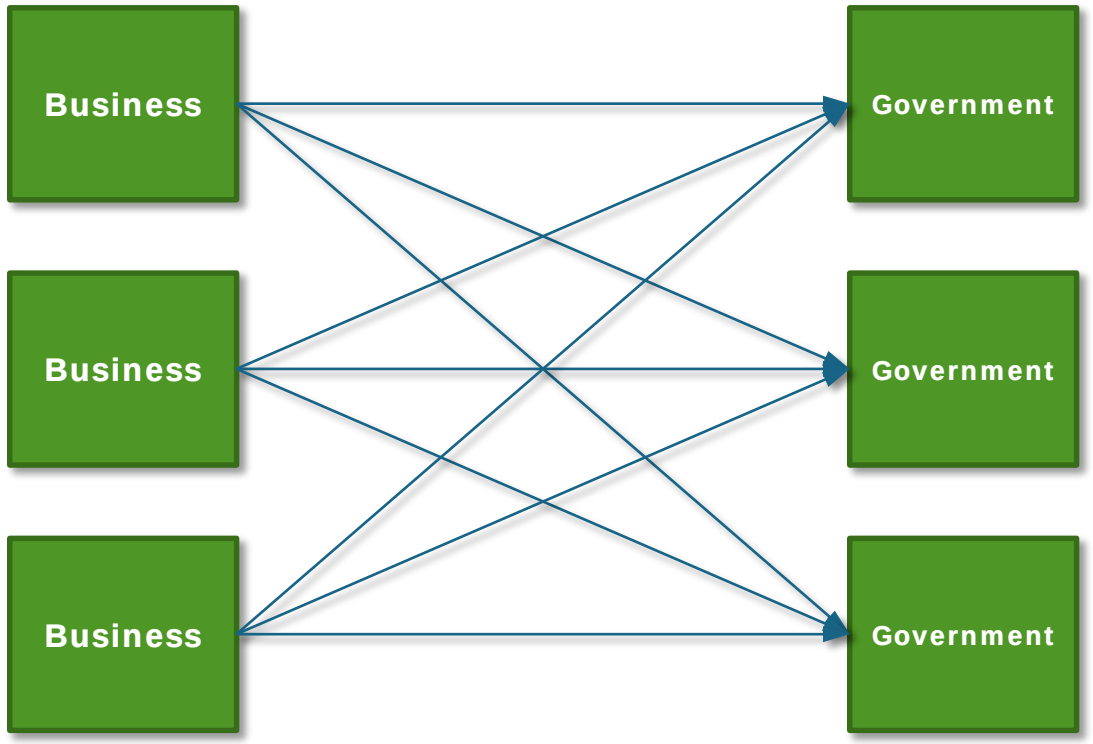
Since 2006, Logius is the **digital government service** of the Netherlands.

It maintains government-wide ICT solutions and common standards, that **simplify the communication** between authorities, citizens and businesses.

https://www.logius.nl/english/

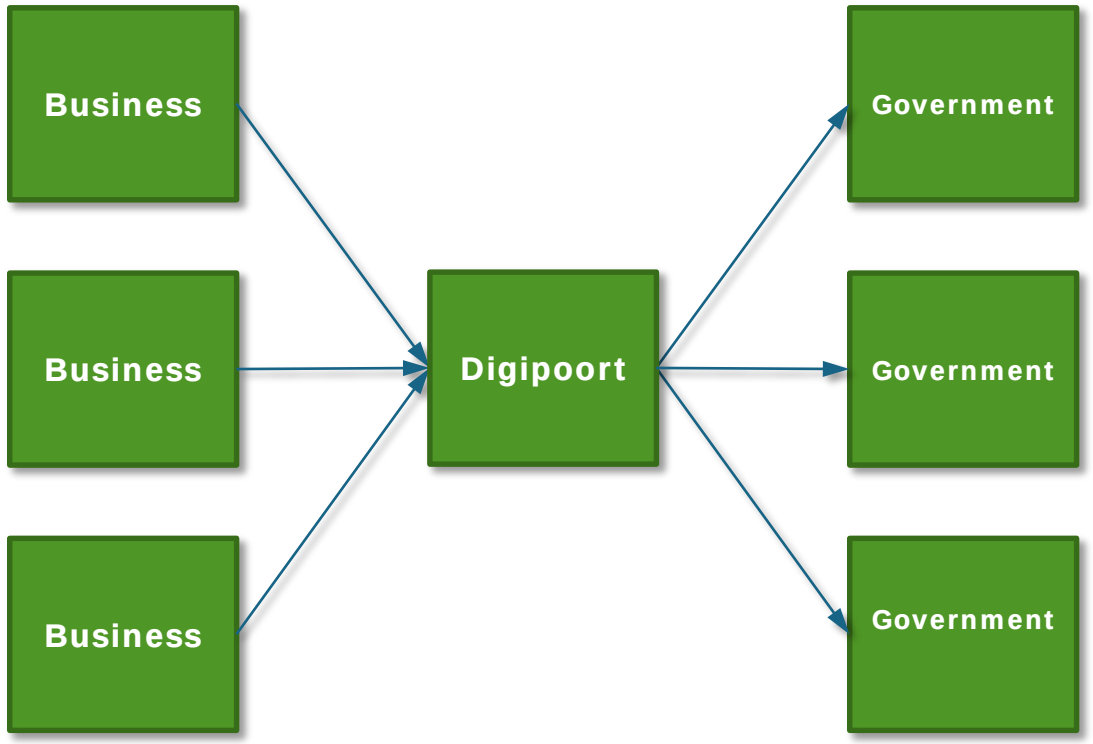
What is Digipoort

- Demand for digital, **system-to-system** information exchange; both government and business
- Declaration of **Tallinn** and **Digital Single Market Strategy** call for interoperability
- Need for uniformity, based on **open standards**



What is Digipoort

- Digipoort is the **digital gateway** for B2G and G2G information exchange
- **Standardization** of communication
- Data exchange based on **laws & regulations**
- Uniform application programming interface (**API**)



Why Digipoort & SBR

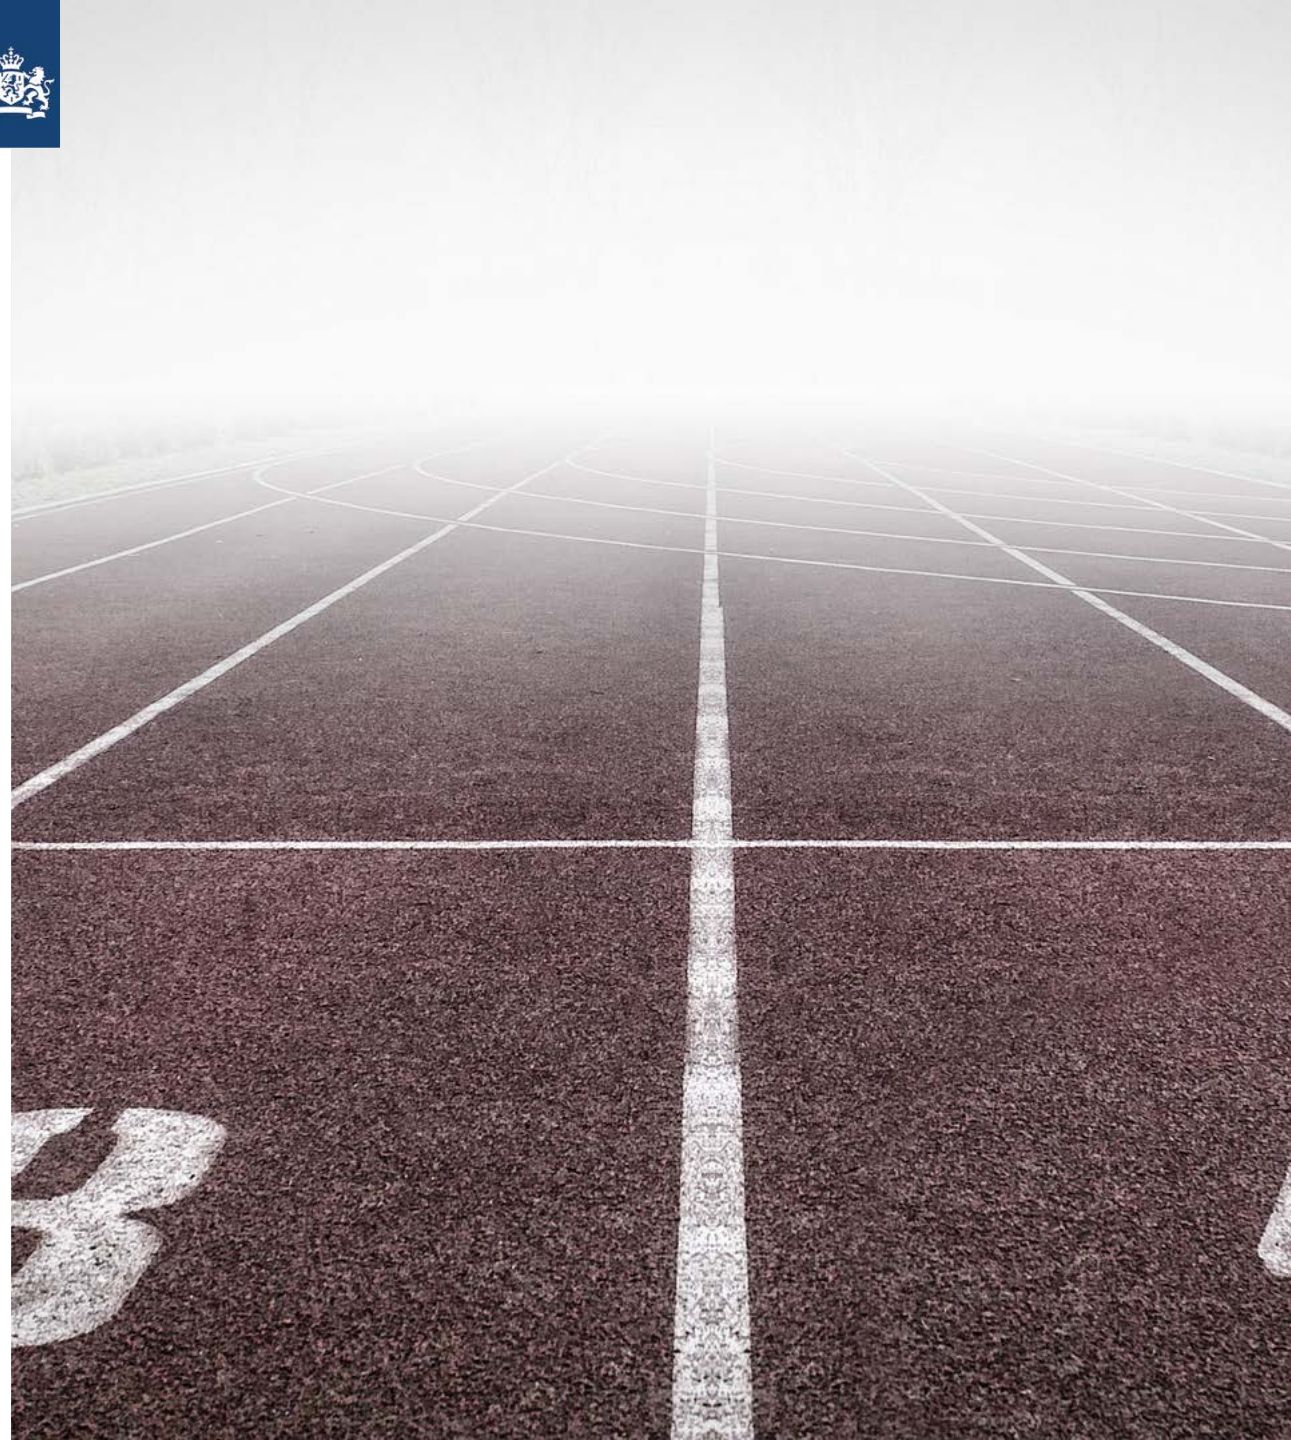
2003:

- Administrative burden on businesses relatively high
- **€ 13-16 billion*** /year
- 2.9-3.7% GDP

* Standard Cost Model / OECD

Reduce the burden

- **Preventing** new regulatory burdens
- **High-trust** approach (cooperation private sector)
- **Smart Regulation** (cooperation EU)
- Improving level of service, including ICT: **Standard Business Reporting**
  → € 350-900 million /year

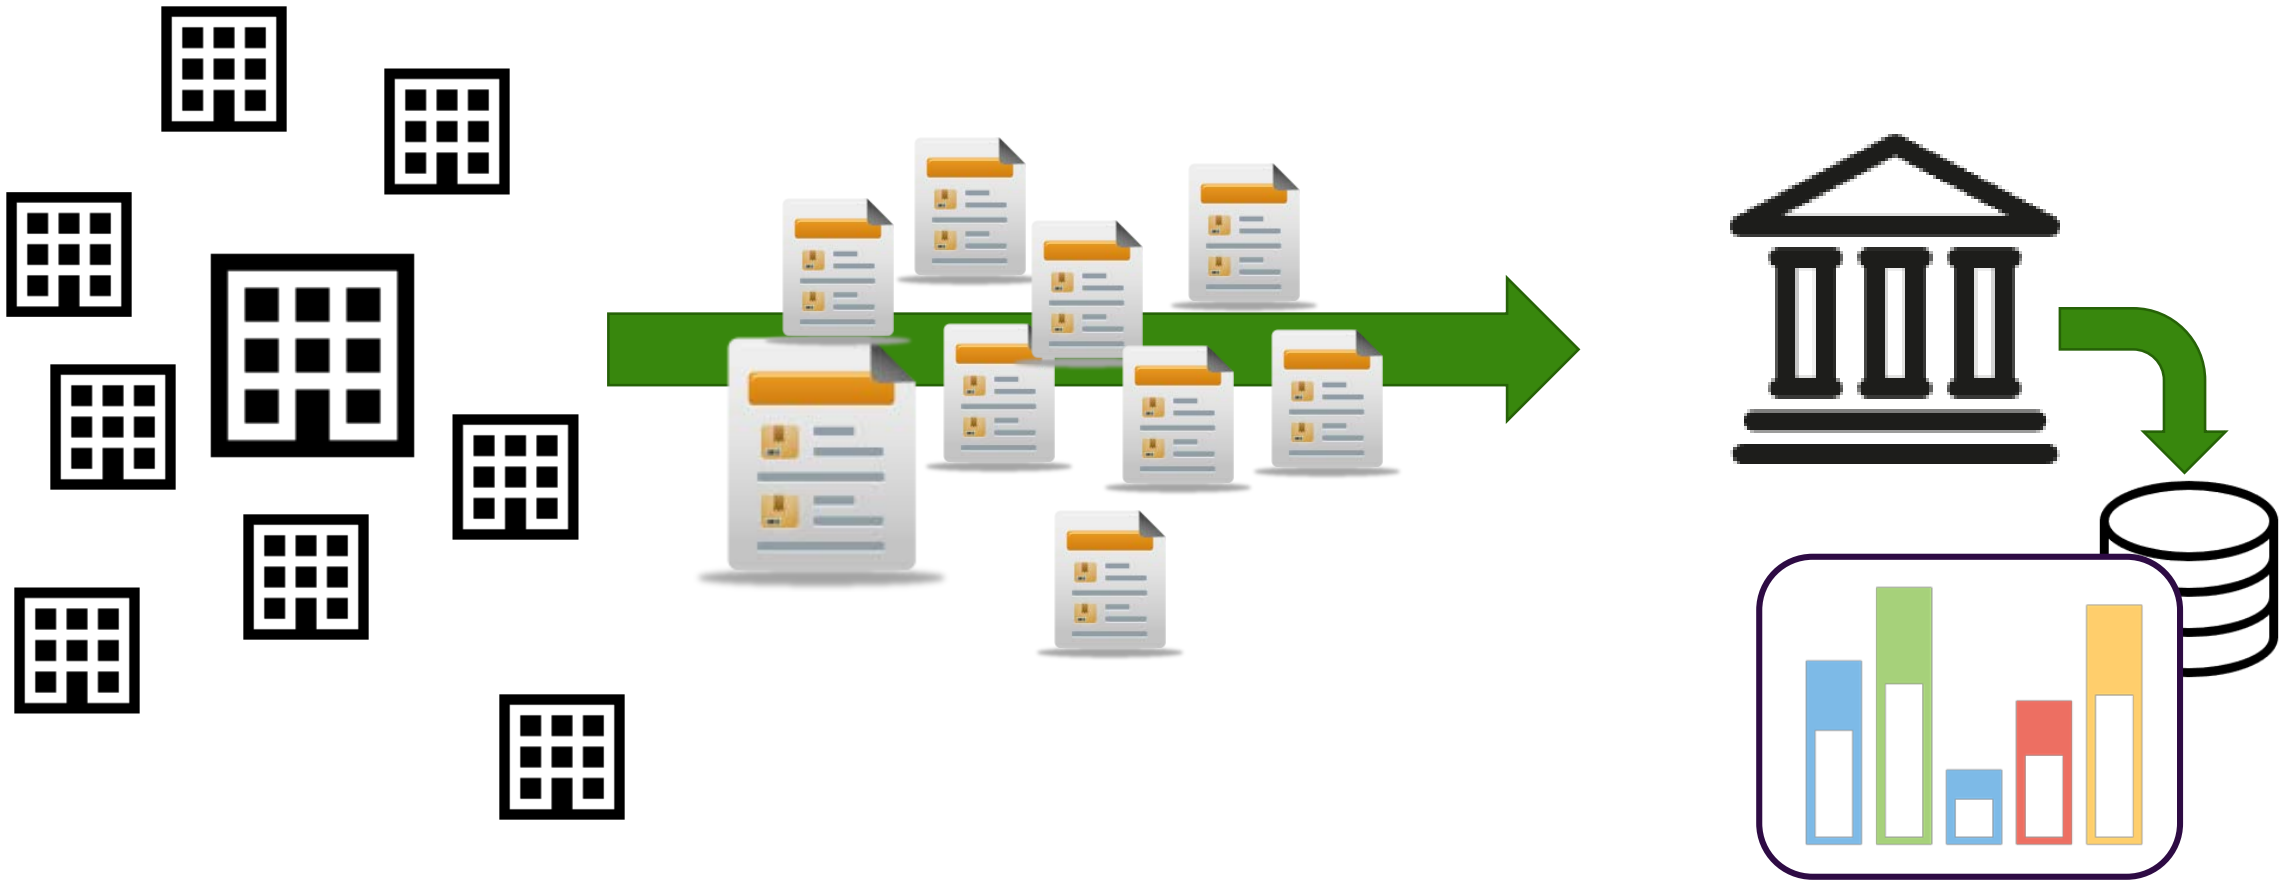


Why Digipoort & SBR

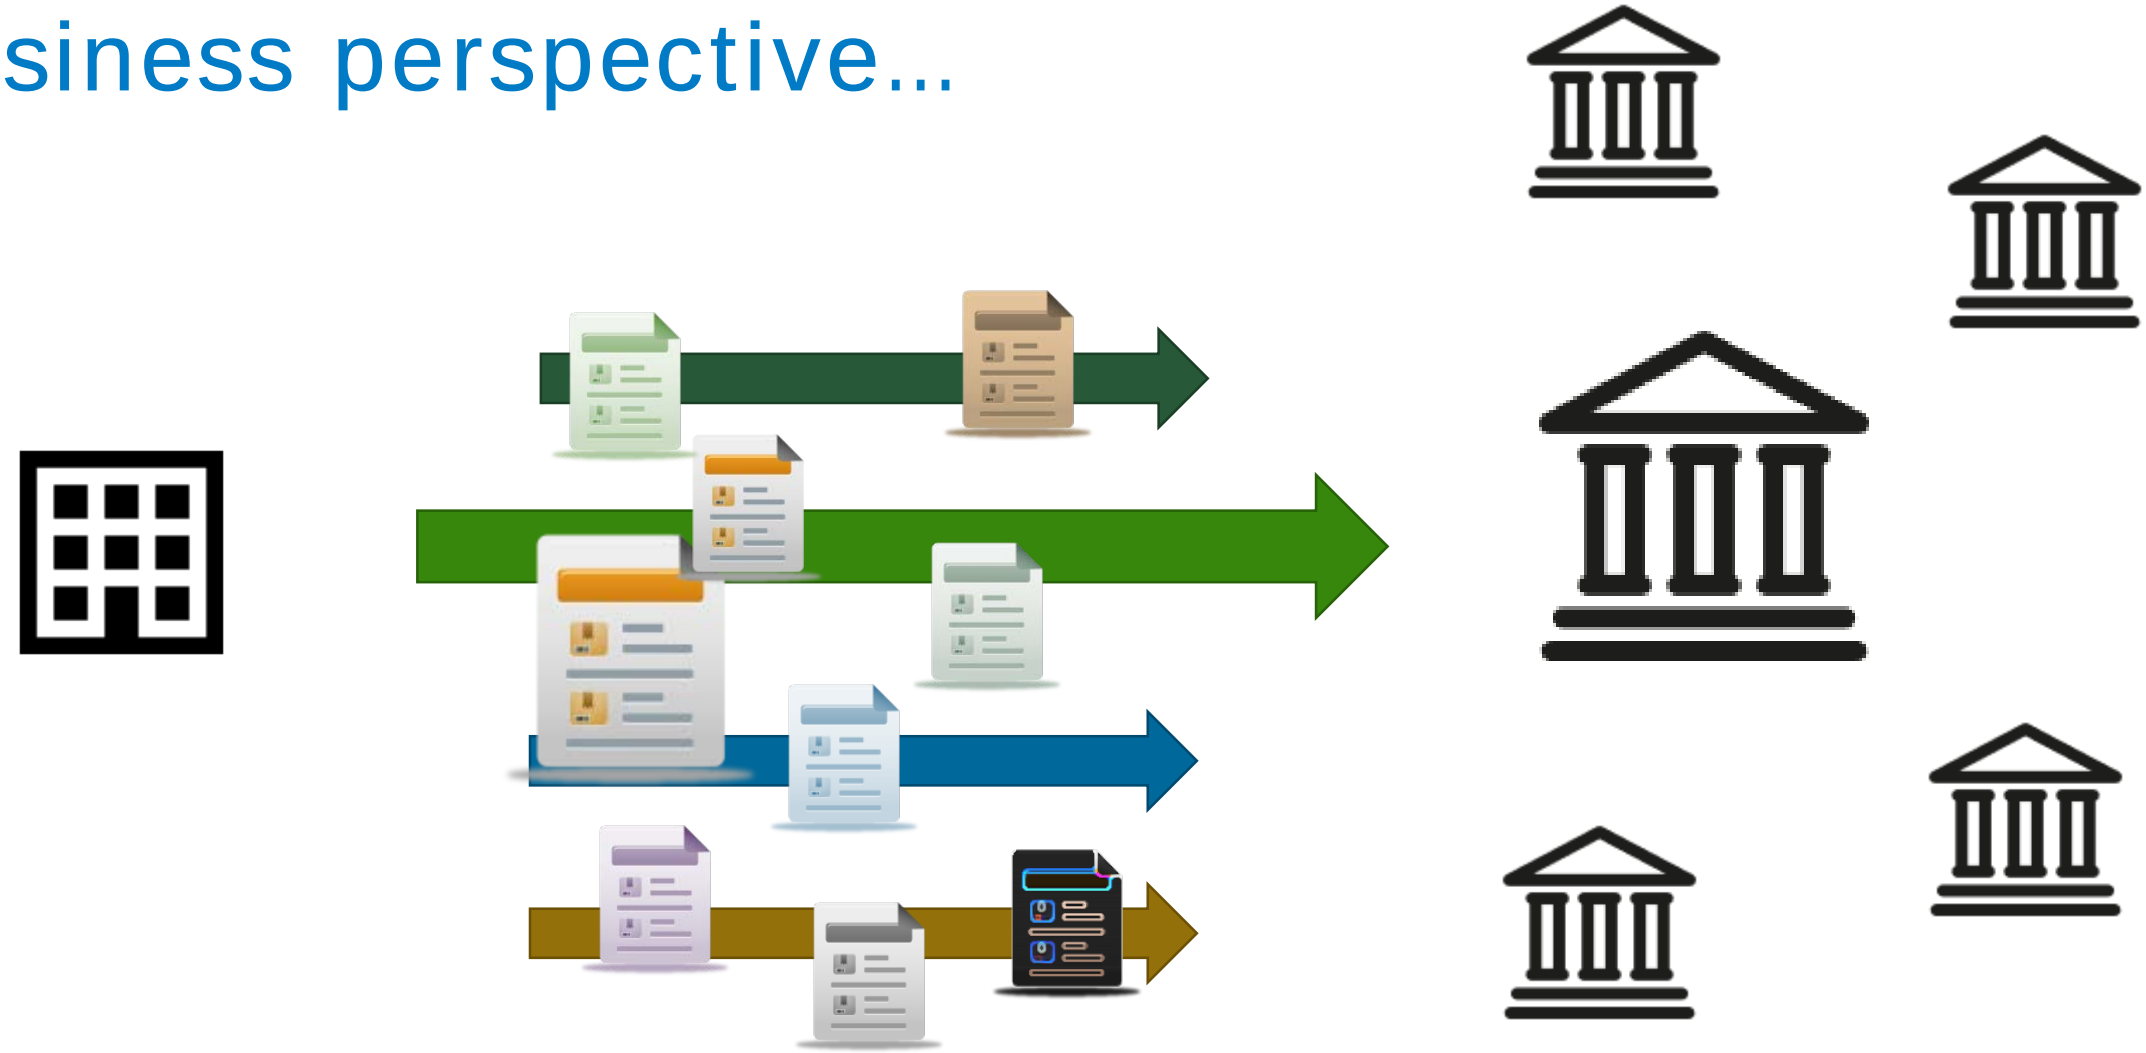
Eliminate obstacles for automation:

- **Standardize** on data definitions, processes & technology
- **Cross-domain** approach
- **Machine-to-machine** reporting

Digital structured data helps the regulator



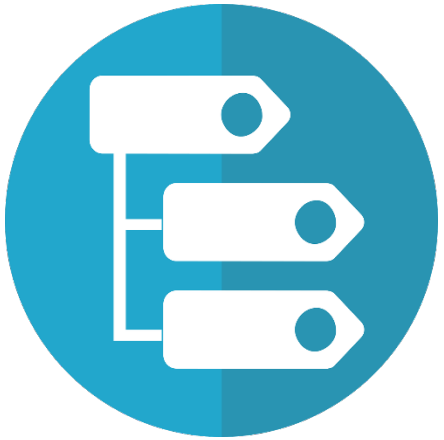
Business perspective…



SBR standardizes on…

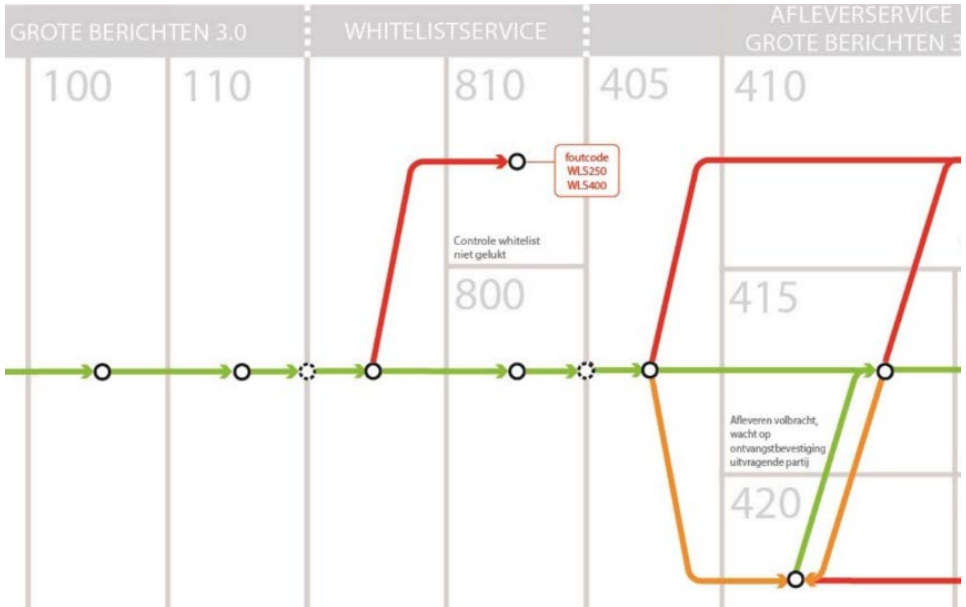
Data definitions

- Re-usable harmonized data definitions



Processes

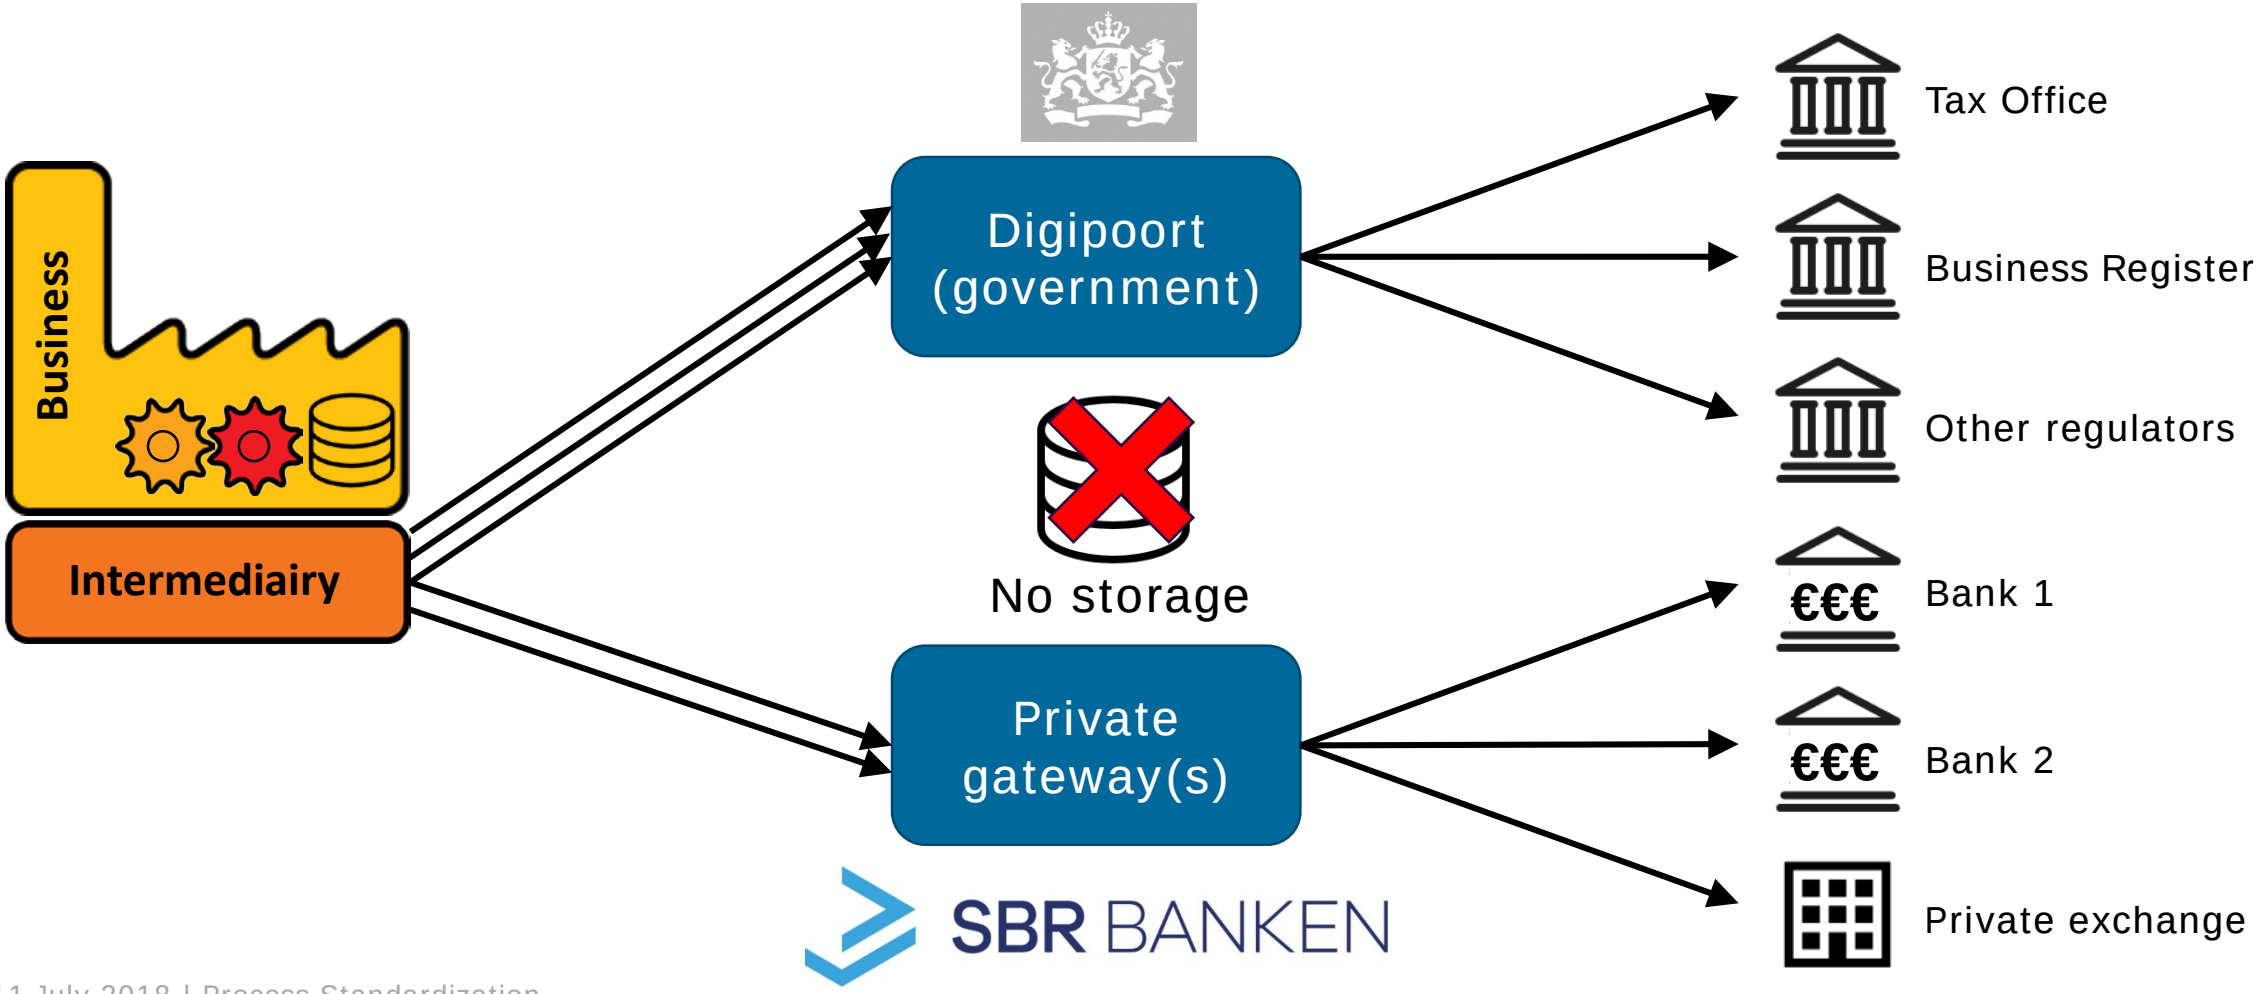
- **Machine-to-machine** reporting



Technology

- Internationally accepted, open **standards**:
  - XBRL
  - SOAP
  - BEPL, BPMN

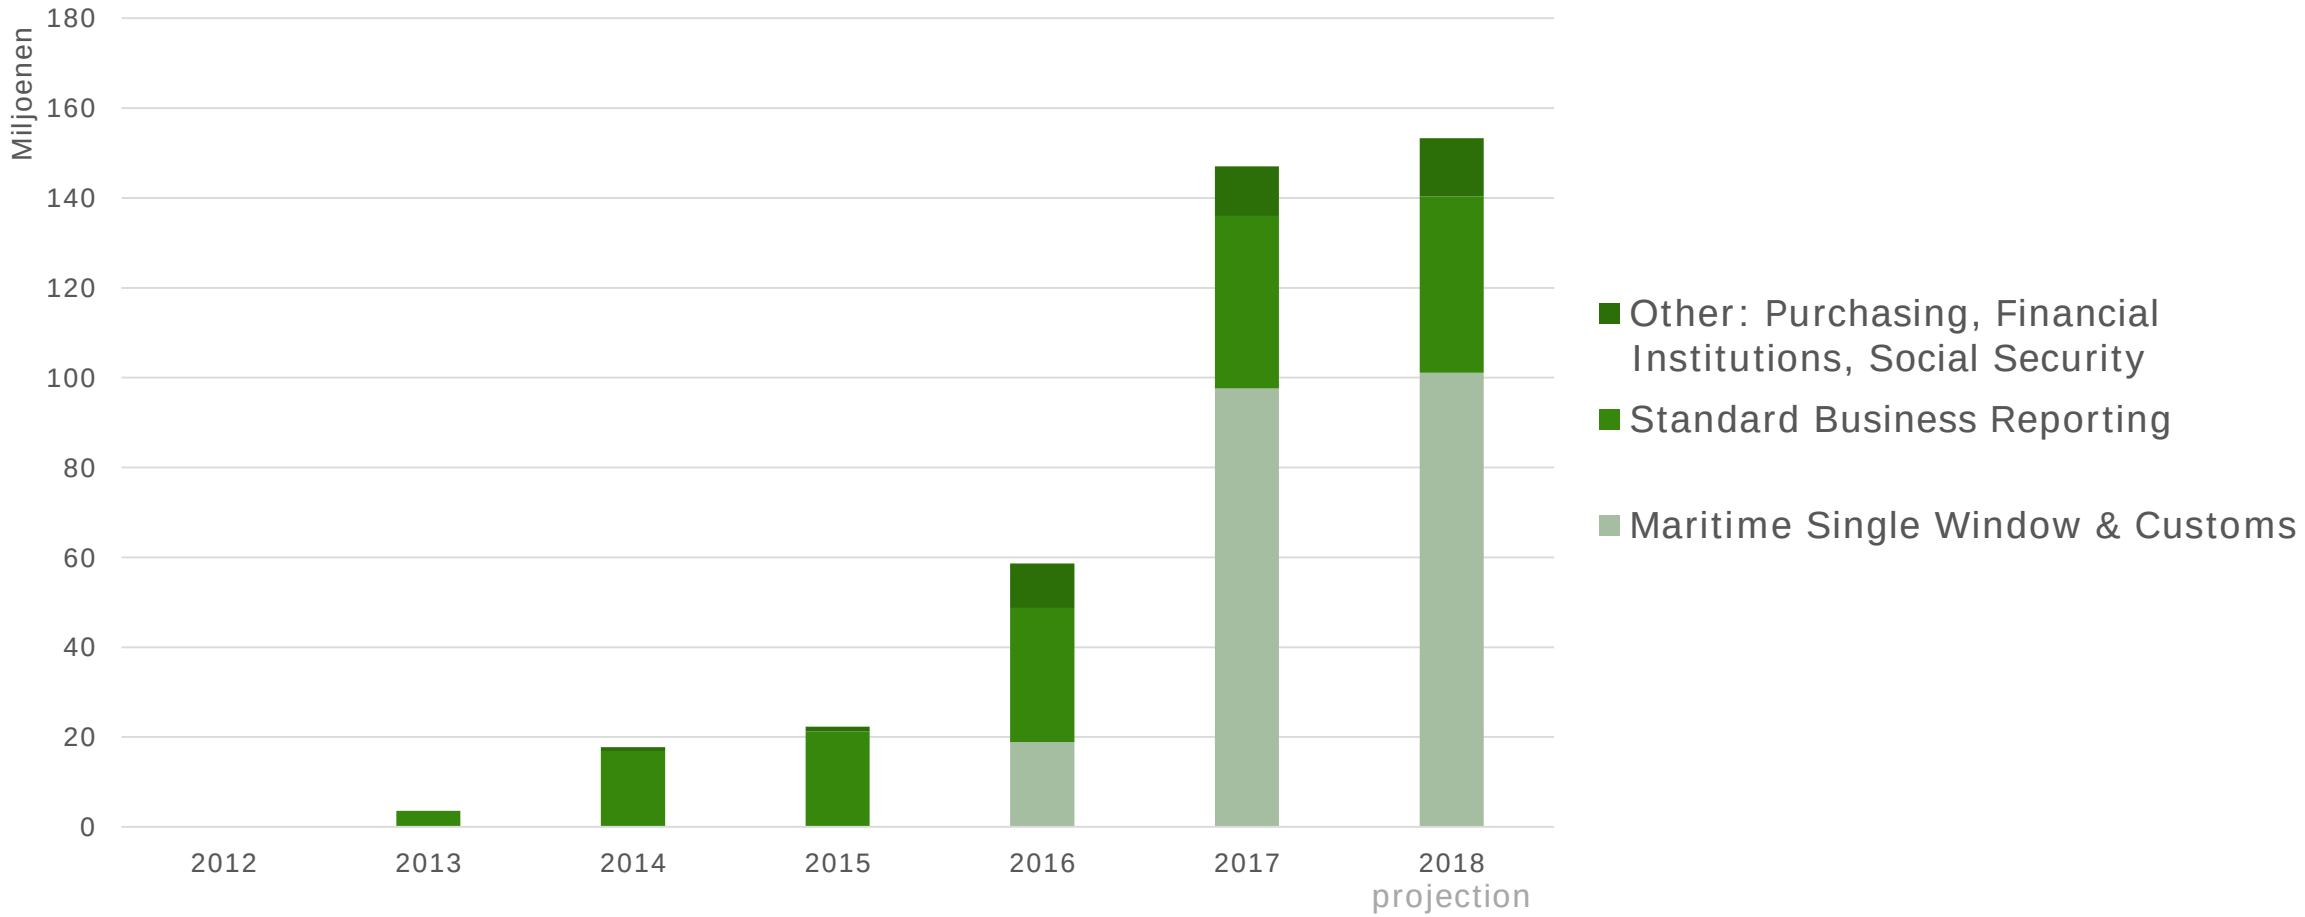
How do Digipoort & SBR work?



Results & lessons learnt

- Public-private cooperation is required
- Cooperation & standardization needs **governance**: Digipoort & SBR
- Going digital takes time & might require a **mandate**
- “Standards level the playing field” → competition, **innovation**, transparency

Digipoort: messages exchanged



Innovative SBR

- Standard Business Reporting
- **Best Practice Certificates**
- 2015 and 2017
- European Public Sector Award (EPSA)
